

Your complete technology & training partner

All ten services, the company foundation, the full technology stack and pricing — one navigable source of truth.

What this portal is

This is the SmartGrow Infotech brand bible — a single, navigable source of truth for everything the company offers. It consolidates the full services catalogue, company foundation, technology stack, and pricing into one reference that sales, delivery, training, and partner teams can all work from.

Use the sidebar to move between volumes, press `/` or `Ctrl K` to search any service or section, and use the copy blocks inside each service to lift ready-to-send marketing descriptions.

The ten services

Every service has its own page with overview, scope, process, technology stack, pricing, and success stories. Jump straight in:

**Product Development**

SaaS, enterprise & MVP software, end to end.

**Web Development**

Corporate sites, e-commerce & web apps.

**Mobile Apps**

Native & cross-platform for iOS and Android.

**B.Tech Projects**

Unique final-year projects with full support.

**CRT Training**

60-day campus recruitment training program.

**Internship Program**

Five tracks of real, production-grade work.

**Technology Consultancy**

CTO-level architecture, audits & strategy.

**Digital Marketing**

SEO, ads, social, content & CRO.

**AI / ML**

Training programs plus custom AI builds.

US**US IT Staffing**

Pre-vetted Indian developers for US teams.

VOLUME 1 — COMPANY

Company Foundation

Who SmartGrow Infotech is, why it exists, and the principles that govern how it works.

Company overview

SmartGrow Infotech is a technology solutions and training company based in Hyderabad, India. Established in 2021, it has grown into a partner for businesses, startups, and students seeking software solutions and professional skill development.

The company's purpose is to bridge the gap between academic learning and industry requirements while delivering software products that drive business growth. Its clientele ranges from early-stage startups to established enterprises, educational institutions, and individual students preparing for corporate careers.

500+

Vision

To be the most trusted technology partner in India — known for innovative solutions that transform businesses and empower individuals with future-ready skills. The company envisions a future where every business has access to affordable, high-quality technology, and every engineering student is job-ready on graduation.

Mission

Deliver exceptional software products that exceed client expectations.

Bridge the skill gap between academic education and industry requirements.

Empower students with practical, job-ready technical and soft skills.

Provide cost-effective technology solutions to startups and SMBs.

Foster innovation and excellence in everything the company does.

Build long-term relationships based on trust, transparency, and results.

Core values

Excellence	Striving for perfection in every project and training program delivered.
Integrity	Operating with complete transparency and honesty in all dealings.
Innovation	Continuously adopting the latest technologies and methodologies.
Customer Success	Measuring success by the success of clients and students.
Empowerment	Enabling people with knowledge, skills, and opportunities.
Commitment	Delivering on promises, every single time.

Why choose SmartGrow

Proven track record	500+ successful projects, 1000+ students trained, 87% placement rate.
Expert team	15+ years of combined industry experience across technologies and domains.
Quality assurance	Industry-standard practices, rigorous testing, 99.9% satisfaction.
Cost-effective	Competitive pricing without compromising on quality.
Modern technology	Current stacks — React, Spring Boot, Flutter, AI/ML, AWS/Azure.

On-time delivery	95% of projects delivered within agreed timelines.
-------------------------	--

24/7 support	A dedicated support team for all clients.
---------------------	---

End-to-end	From ideation to deployment, maintenance, and scaling.
-------------------	--

Student-centric	A distinctive focus on making students job-ready.
------------------------	---

Long-term partnership	Lasting relationships, not one-off deliveries.

SERVICE 01 — PRODUCT DEVELOPMENT

Product Development

End-to-end product engineering that turns ideas into market-ready, scalable software.

Service overview

Product Development is a comprehensive end-to-end service that transforms ideas into market-ready, scalable software products — SaaS applications, enterprise solutions, marketplaces, and custom products that solve real business problems.

The approach is rooted in Agile methodology for flexibility, continuous feedback, and iterative improvement. The team architects solutions that scale from 100 users to 1 million, and from a single region to global operations.

What we build

SaaS applications	Cloud platforms with subscription models, multi-tenancy, and automated billing.
Enterprise software	Custom ERP, CRM, HRMS, and industry-specific solutions.
MVP development	Minimum viable products to test market fit fast (6–8 weeks).
E-commerce platforms	Full stores with payment gateways, inventory, and analytics.
Marketplace platforms	Multi-vendor marketplaces connecting buyers and sellers.
FinTech solutions	Payments, digital wallets, trading and lending platforms.
HealthTech solutions	Telemedicine, health records, appointment scheduling.

EdTech platforms LMS, online course platforms, and student portals.

Development process

- **PHASE 1 · 1 WEEK**
Discovery & planning
Requirement gathering, market and competitor research, user personas, stack selection, architecture and wireframing.
 - **PHASE 2 · 1-2 WEEKS**
Design
User-centric UI/UX, interactive prototypes, a design system, and client iterations.
 - **PHASE 3 · 4-12 WEEKS**
Development
Two-week Agile sprints, clean maintainable code, weekly demos, CI/CD, API and third-party integrations.
 - **PHASE 4 · 2-3 WEEKS**
Testing & deployment
Functional, integration and performance testing, security assessment, production setup, and go-live support.
-

Technology stack

Frontend	React.js, Angular, Vue.js, TypeScript, Next.js
Backend	Spring Boot (Java), Node.js, Python (Django/FastAPI), .NET Core
Databases	PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch
Cloud & DevOps	AWS, Azure, Google Cloud, Docker, Kubernetes, Jenkins
Additional	GraphQL, WebSockets, Kafka, payment gateways (Stripe, Razorpay)

Pricing

MVP development

**₹3,50,000 –
₹6,00,000**

6–8 weeks

Full product

**₹8,00,000 –
₹15,00,000**

3–4 months

Enterprise solutions

6+ months

Monthly retainer

**₹1,50,000 –
₹5,00,000**

per month

Success stories

EdTech SaaS platform An online learning platform now serving 25,000+ active users and ₹15L+ monthly revenue.

E-commerce marketplace A multi-vendor platform processing 10,000+ orders/month and ₹50L+ GMV.

FinTech solution A payment platform handling ₹10Cr+ in transactions monthly.

PRODUCT DEVELOPMENT — MARKETING DESCRIPTION

Turn your idea into a market-ready product. SmartGrow Infotech builds scalable SaaS platforms, enterprise software, marketplaces and MVPs end to end — from discovery and design through Agile

development, testing and launch. Architected to scale from 100 to 1,000,000 users. MVPs from ₹3.5L in 6–8 weeks. Talk to us: info@smartgrowinfotech.com

SERVICE 02 — WEB DEVELOPMENT

Web Development

High-performance websites and web apps that convert visitors into customers.

Service overview

Web Development covers stunning, high-performance websites that look beautiful and drive business results — corporate sites, e-commerce stores, and complex web applications built to convert.

Types of websites we build

Corporate websites	Company profile, services, team pages, and blog.
E-commerce	Cart, payment gateway, inventory, and order tracking.
Portfolio websites	For designers, photographers, and artists.
Custom web apps	CRM, project management, booking systems, dashboards.
Landing pages	High-converting pages with lead capture and A/B testing.
Progressive web apps	App-like experience with offline support and push notifications.

Key features implemented

- Mobile-responsive design across all devices
- Fast loading (under 2 seconds)
- SEO optimization to rank on Google

- Contact forms with email notifications
- Google Maps and social media integration
- SSL security (HTTPS)
- Analytics (Google Analytics, Facebook Pixel)
- Live chat integration
- Blog/CMS for content management
- Payment gateway integration
- User registration and login

Technologies used

Frontend	HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS, Bootstrap
Backend	Node.js, PHP (Laravel), Python (Django), Java Spring Boot
CMS	WordPress, custom CMS, headless CMS (Strapi, Contentful)
E-commerce	WooCommerce, Shopify, custom solutions, Magento

SEO & performance

- Keyword research and on-page optimization
- Meta tag (title, description) optimization
- Image compression and lazy loading
- Code minification and browser caching
- CDN integration for global fast loading
- Mobile-first indexing
- Schema markup for rich snippets
- Core Web Vitals optimization

Pricing

Basic website

**₹25,000 –
₹50,000**

5–10 pages,
responsive, SEO, 1
month support

Business website

**₹50,000 –
₹1,50,000**

10–20 pages, custom
design, blog, 3 months
support

E-commerce

**₹1,50,000 –
₹5,00,000**

Full-featured store with
admin panel

Web application

₹3,00,000+

Complex functionality
and integrations

Monthly maintenance

**₹5,000 –
₹25,000**

per month

WEB DEVELOPMENT — MARKETING DESCRIPTION

Websites that work as hard as you do. SmartGrow Infotech designs and builds fast, responsive, SEO-ready websites and web apps — corporate sites, e-commerce stores, landing pages and PWAs — engineered to load in under 2 seconds and convert visitors into customers. Sites from ₹25,000. Get a quote: info@smartgrowinfotech.com

SERVICE 03 — MOBILE APP DEVELOPMENT

Mobile App Development

Native and cross-platform apps, from concept to App Store and Play Store launch.

Service overview

In a mobile-first world, a powerful app is essential. The team builds native and cross-platform applications that deliver exceptional user experiences — handling everything from concept to App Store and Play Store launch.

Types of apps we build

iOS apps	Native apps using Swift/SwiftUI for iPhone and iPad.
Android apps	Native apps using Kotlin/Java.
Cross-platform	Single codebase for iOS & Android using React Native or Flutter.
Hybrid apps	Cost-effective solutions using web technologies.
Enterprise apps	Internal apps for employee productivity.
Consumer apps	B2C apps for retail, services, and entertainment.

Popular categories

- E-commerce & shopping
- On-demand services (taxi, food, home services)
- Social networking
- FinTech (banking, payments, investment, crypto)

Healthcare & telemedicine

Education & learning

Food, restaurant & delivery

Travel & booking

Entertainment & streaming

Development process

○ DISCOVERY

Requirement analysis

Competitor research, feature planning, and wireframing.

○ DESIGN

UI/UX & prototypes

User flow, prototypes, and a design system.

○ DEVELOPMENT

Agile build

API integration, backend setup, and regular updates.

○ TESTING

Multi-device QA

Functional, device, performance, and beta testing.

○ LAUNCH

Store submission

App Store and Play Store submission and approval.

○ POST-LAUNCH

Maintenance

Monitoring, updates, bug fixes, and new features.

Technology stack

iOS	Swift, SwiftUI, Xcode, CocoaPods
Android	Kotlin, Java, Android Studio, Gradle
Cross-platform	React Native, Flutter, Xamarin
Backend	Node.js, Spring Boot, Firebase, AWS Amplify
Database	SQLite, Realm, Firebase Realtime Database, PostgreSQL
Cloud	AWS, Google Firebase, Azure Mobile Services

Key features implemented

Authentication (email, phone, social login)
Push notifications
In-app payments (Google Pay, Apple Pay, Stripe)
Real-time chat and messaging
GPS and location services
Camera and gallery integration
Barcode/QR scanning
Offline functionality
Social sharing
Analytics and crash reporting
Admin dashboard

Pricing

Simple app	Medium complexity	Complex app
------------	-------------------	-------------

**₹2,00,000 –
₹4,00,000**

Basic features, single
platform

**₹4,00,000 –
₹7,00,000**

Advanced features,
both platforms

**₹7,00,000 –
₹15,00,000**

Multiple features,
integrations, both
platforms

Enterprise app

₹15,00,000+

Custom requirements,
high security

Time Typical timeline: 2–6 months depending on complexity.

MOBILE APP DEVELOPMENT — MARKETING DESCRIPTION

From idea to the App Store. SmartGrow Infotech builds native and cross-platform mobile apps (iOS, Android, React Native, Flutter) with payments, push, chat, offline mode and an admin dashboard — handling design, development, testing and store launch. Apps from ₹2L. Start your app: info@smartgrowinfotech.com

SERVICE 04 — B.TECH PROJECTS

B.Tech Final Year Projects

Unique, industry-standard final-year projects with full training, documentation and support.

Service overview

A final-year project is a student's first professional portfolio piece and often the most discussed topic in placement interviews. SmartGrow provides industry-standard, unique projects with complete training, documentation, and support — built on current technologies and designed to impress recruiters while helping students genuinely understand what they built.

Why these projects are different

100% unique	Not copied from the internet or GitHub; customised to requirements and syllabus.
Latest technologies	Current tech stacks recruiters actually look for.
Live deployment	Hosted on cloud with a live URL for impressive demos.
Complete training	A 1-hour live session explaining every line of code and the logic.
Interview prep	Coaching on how to answer technical questions about the project.
GitHub repository	A professional repo that shows on the resume.
Documentation	100+ page report, PPT, and synopsis — all IEEE formatted.
30-day support	Available for any questions or modifications until submission.

Project domains covered

Web development

- E-commerce platform
- Social media platform
- College management system
- Job portal
- Online food ordering
- Real estate management
- Hospital management
- Library management

Mobile apps

- Expense tracker
- Fitness & health app
- Grocery delivery
- Language learning
- Food recipe app
- Real-time chat application

AI / ML

- Disease prediction system
- Stock price prediction
- Fake news detection
- Crop recommendation
- Chatbot with NLP
- Image recognition
- Sentiment analysis

Recommendation system

IoT & embedded

- Smart home automation
- Agriculture monitoring
- Health monitoring
- Smart parking
- Industrial safety

Blockchain

- Blockchain voting system
- Supply chain management
- Cryptocurrency wallet
- Document verification

Technologies used

Frontend	React.js, Angular, Vue.js, HTML5/CSS3, JavaScript, Bootstrap, Material-UI
Backend	Spring Boot (Java), Node.js, Python (Django/Flask), PHP (Laravel)
Mobile	React Native, Flutter, Android (Kotlin/Java), iOS (Swift)
Databases	MySQL, PostgreSQL, MongoDB, Firebase
AI/ML	Python, TensorFlow, scikit-learn, Keras, OpenCV, NLTK
IoT	Arduino, Raspberry Pi, ESP8266, NodeMCU, sensors
Blockchain	Solidity, Ethereum, Hyperledger, Web3.js
Cloud	AWS, Heroku, Firebase, Netlify, Vercel

What's included in every project

Complete, well-commented source code

Professional GitHub repository with commit history

Database scripts / setup instructions

100+ page IEEE-format report

30–40 slide PowerPoint

5–10 page synopsis

Installation and usage video tutorials

1-hour live explanation session

Step-by-step installation guide

User manual

Test cases and results

30-day email/WhatsApp support

Delivery process

○ DAY 0–1

Requirements

Domain selection and project finalisation.

○ DAY 2–7

Development

Built to your specs and college guidelines.

○ DAY 8–9

Documentation

Report, PPT, and synopsis prepared.

○ DAY 10

First delivery

You review everything.

○ DAY 11

Live training

The entire project explained to you.

○ DAY 12+

Support

Help with any issues or questions.

Pricing

Student testimonials

I was worried about my project, but SmartGrow delivered an amazing AI-based disease prediction system. Got an A grade and three interview calls.

Priya Sharma · CBIT

The training session was so detailed that I could answer every question in my project viva.

Rahul Verma · VJIT

My blockchain voting system impressed everyone — even professors asked for the GitHub link.

Sneha Reddy · JNTUH

B.TECH PROJECTS — MARKETING DESCRIPTION

Stand out in placements with a final-year project recruiters notice. SmartGrow Infotech builds 100% unique, live-deployed B.Tech projects across Web, AI/ML, IoT and Blockchain — with IEEE documentation, a GitHub repo, a 1-hour code walkthrough and 30 days of support. From ₹8,000; 10% off for groups of 3+. Enquire: info@smartgrowinfotech.com

SERVICE 05 — CAMPUS RECRUITMENT TRAINING

CRT Training Program

A 60-day program that turns engineering students into placement-ready professionals.

Service overview

The Campus Recruitment Training (CRT) program is the flagship training initiative — designed to make engineering students placement-ready in 60 days. With an 87% placement success rate, it systematically covers everything from Data Structures & Algorithms to soft skills and mock interviews.

Unlike theoretical college courses, the program is practical and interview-oriented: students learn to solve problems under pressure, explain their approach clearly, and present themselves confidently in every round.

Why students choose CRT

87% placement rate Against a 40–60% industry average.

Average package ₹4.5 LPA Significantly higher than non-trained students.

Expert faculty Industry professionals with 8+ years' experience.

Small batches Maximum 30 students per batch.

Practical focus 70% hands-on practice vs 30% theory.

500+ coding problems Curated to cover all interview patterns.

Real mock interviews Simulated environment with detailed feedback.

Career support ATS-friendly resume, LinkedIn optimisation, and placement assistance.

60-day curriculum

○ WEEK 1–3 · 24 DAYS

Data Structures & Algorithms

Foundations (arrays, strings, hashing, two-pointer, sliding window, binary search), intermediate (linked lists, stacks, queues, trees, traversals), and advanced (graphs, heaps, DP, backtracking, greedy). Daily practice of 5–10 problems.

○ WEEK 4–5 · 12 DAYS

Programming languages

Java track (OOP, collections, exceptions, Java 8) or Python track (fundamentals, comprehensions, OOP, libraries), plus 50+ coding problems and optimisation techniques.

○ WEEK 6 · 6 DAYS

System design fundamentals

Scalability, load balancing, caching, SQL vs NoSQL, API design, microservices, and sample designs (URL shortener, Twitter feed, Instagram stories).

○ WEEK 7 · 6 DAYS

Aptitude & reasoning

Quantitative aptitude and logical reasoning with 200+ problems and mock tests.

○ WEEK 8 · 6 DAYS

Soft skills & communication

Communication, group discussion, HR interview (STAR method), and personal branding.

Mock interviews

Week 3	DSA basics assessment.
Week 5	DSA + programming combined.
Week 7	Complete technical round.
Week 8	HR / behavioural interviews.

Each interview runs 45–60 minutes, is video-recorded for self-review, and comes with a detailed feedback report and a personalised improvement plan.

Learning resources

- Comprehensive PDF notes and presentations
 - Lifetime access to session recordings
 - 500+ curated practice problems with solutions
 - Cheat sheets and quick reference guides
 - Company-wise previous-year interview questions
 - LeetCode Premium access (worth ₹3,000/year)
 - Dedicated WhatsApp doubt-resolution group
 - Two one-on-one mentorship sessions
-

Investment & ROI

Batch details

Duration	60 days (8 weeks), Monday to Saturday
Training hours	240+ hours (4 hours/day)
Batch size	Maximum 30 students
Mode	Hybrid — offline (Hyderabad) + online live sessions
Timings	Morning (9 AM–1 PM) or evening (5 PM–9 PM)

CRT PROGRAM — MARKETING DESCRIPTION

Get placement-ready in 60 days. SmartGrow Infotech's Campus Recruitment Training covers DSA, core programming, system design, aptitude and interview skills — with 500+ problems, real mock interviews and an 87% placement rate (avg ₹4.5 LPA). Early-bird from ₹6,999. Limited to 30 seats. Enroll: info@smartgrowinfotech.com

SERVICE 06 — INTERNSHIP PROGRAM

Internship Program

Real, production-grade work across five tracks — with mentorship and PPO opportunities.

Service overview

At SmartGrow, interns are junior developers, not coffee-fetchers. They work on real client projects, write production-ready code, and learn from experienced professionals — hands-on experience that builds a resume and prepares them for full-time roles.

Internships span five in-demand tracks. Top performers receive Pre-Placement Offers (PPO) to join full-time after graduation.

Internship tracks

Full-Stack Development Java, Spring Boot, React.js, PostgreSQL, AWS, Docker — REST APIs, responsive UIs, database design, AWS deployment, Git, code reviews. Stipend ₹8,000–₹15,000/month.

Mobile App Development React Native, Flutter, Firebase, REST APIs — cross-platform apps, API integration, push notifications, store deployment, testing. Stipend ₹7,000–₹12,000/month.

Data Engineering Python, Kafka, Airflow, Spark, AWS, PostgreSQL — data pipelines, real-time processing, ETL, query optimisation, dashboards. Stipend ₹10,000–₹15,000/month.

DevOps & Cloud AWS, Docker, Kubernetes, Jenkins, Terraform, Linux — CI/CD, containerisation, cluster management, monitoring, infrastructure automation. Stipend ₹8,000–₹15,000/month.

AI/ML Engineering Python, TensorFlow, PyTorch, scikit-learn, Pandas, NumPy — ML models, NLP and computer vision, data preprocessing, model deployment. Stipend

₹10,000–₹15,000/month.

What makes it different

Real projects	Actual client projects that go to production, not toy apps.
Experienced mentors	Developers with 8+ years of industry experience.
Daily code reviews	Learn best practices and clean code.
Daily standups	Real Agile methodology and team sync-ups.
Portfolio building	3–5 professional projects for your resume.
Certificate & recommendation	Valued by recruiters and HR managers.
PPO opportunity	60% of top performers get full-time offers.
Alumni network	Join a community of 250+ alumni in top companies.

Internship structure

○ WEEK 1–2

Onboarding & training

Company processes and tools, Git training, code-review standards, environment setup, and starter tasks.

○ WEEK 3–8

Active development

Assigned to real client projects — features, bug fixes, code reviews, daily standups, and weekly mentor reviews.

○ WEEK 9–12

Advanced work

Own complete features, lead small modules, present work, and prepare a final presentation.

Requirements to apply

Currently in 2nd, 3rd, or final year of engineering

Basic programming in any language (Java/Python/JavaScript)

Commitment to full-time work (6 days/week) during the internship

A hunger to learn and grow as a developer

Good communication skills (English)

Own laptop required

Selection process

○ STEP 1

Application

Online application with resume.

○ STEP 2

Coding test

Online DSA and programming test.

○ STEP 3

Technical interview

Problem-solving and fundamentals.

○ STEP 4

HR interview

Communication and commitment.

○ STEP 5

Offer & onboarding

Offer letter and onboarding.

Compensation

Stipend range ₹5,000 – ₹15,000/month, based on performance and track.

Performance reviews Monthly evaluations can increase the stipend.

Conversion rate 60% of top performers receive a PPO.

Full-time salary ₹3.5 – ₹6 LPA after PPO conversion.

Success stories

The internship at SmartGrow was life-changing. I learned more in 3 months than in 3 years of college. Got a PPO and now work as a Junior Developer.

Karthik Rao · MGIT

Best decision ever. I worked on a real e-commerce project used by thousands of users — my resume looked amazing in placements.

Anjali Reddy · CBIT

How to apply

Email info@smartgrowinfotech.com

Subject line Internship Application – [Your Track] – [Your Name]

Attach Resume + a cover letter on why you want to intern

Intake Year-round (continuous), with flexible start dates

INTERNSHIP PROGRAM — MARKETING DESCRIPTION

Work like a real developer, not a student. SmartGrow Infotech offers hands-on internships across Full-Stack, Mobile, Data Engineering, DevOps and AI/ML — real client projects, daily mentorship and code reviews, a certificate and recommendation, and a 60% PPO conversion rate. Stipend ₹5,000–₹15,000/month. Apply: info@smartgrowinfotech.com

SERVICE 07 — TECHNOLOGY CONSULTANCY

Technology Consultancy

CTO-level guidance on architecture, scaling, security and tech strategy — without a full-time hire.

Service overview

The right technology decisions save months of development time and lakhs of rupees. This consultancy provides expert guidance from professionals who have built, scaled, and maintained systems handling millions of users — helping startups and businesses decide on architecture, stack, scaling, security, and more.

When you need it

Starting a new project and unsure about the tech stack

An existing system is slow and you don't know why

Planning to scale from 1,000 to 100,000+ users

Getting conflicting advice from different developers

Need to pass a security audit for compliance

Considering microservices but unsure if it fits

Hiring a technical team and need to evaluate candidates

A product has too much technical debt

Want to migrate to cloud but don't know where to start

Need a CTO perspective without a full-time CTO

Consulting services

Technology stack selection	Evaluate requirements and recommend frontend, backend, database and cloud — with justification. Deliverable: stack recommendation document.
Architecture review & design	Find bottlenecks, design for greenfield, microservices vs monolith, schema review, API strategy, caching. Deliverable: diagrams, design docs, roadmap.
Code review & quality audit	Review for quality, security and performance; identify technical debt; OWASP checks. Deliverable: prioritised audit report.
Performance optimization	Profile bottlenecks, optimise queries, tune frontend, caching, CDN, load testing. Deliverable: optimisation report with fixes.
Security assessment	OWASP Top 10 review, auth and encryption review, API security, pen-test recommendations. Deliverable: assessment with remediation steps.
Cloud migration strategy	Cloud readiness, provider choice, architecture, cost estimation, migration roadmap. Deliverable: migration plan with timelines.
Scaling strategy	Identify bottlenecks, horizontal/vertical scaling, DB scaling, load balancing, caching, queues. Deliverable: scaling roadmap.
Team capability assessment	Skill assessment, code-quality review, training needs, hiring plan. Deliverable: team report with recommendations.
DevOps implementation	CI/CD, Docker, Kubernetes, Terraform, monitoring, automated testing. Deliverable: implementation plan.
Technical due diligence	Codebase, debt, team, scalability, security and risk review for investors. Deliverable: due-diligence report.

Our approach

○ STEP 1 · FREE, 30 MIN

Discovery call

Understand the situation, challenges, and goals.

○ STEP 2

Proposal & scope

Define scope, timeline, and pricing.

○ STEP 3

Deep-dive analysis

Review systems, code, documentation, and team.

○ STEP 4

Recommendations & roadmap

Detailed recommendations with an implementation plan.

○ STEP 5

Q&A session

Answer questions and clarify recommendations.

○ STEP 6 · OPTIONAL

Follow-up support

Help with implementation or ongoing advisory.

Success stories

Startup saved ₹8 lakhs Advised against microservices for a 10-user MVP; recommended a simpler monolith and saved six months of over-engineering.

E-commerce site 10× faster Identified an N+1 query problem and improper caching; load time dropped from 8 seconds to 0.8.

Passed a security audit first try Guided fixes for all OWASP vulnerabilities; the client passed a SOC 2 audit.

TECHNOLOGY CONSULTANCY — MARKETING DESCRIPTION

Get CTO-level guidance without hiring a CTO. SmartGrow Infotech advises on architecture, tech-stack selection, scaling, security, cloud migration, performance and DevOps — delivered as clear reports and roadmaps. First 30-minute consultation free. From ₹5,000/hour. Book a call: info@smartgrowinfotech.com

SERVICE 08 — DIGITAL MARKETING

Digital Marketing

Data-driven marketing across every channel — built by people who understand technology businesses.

Service overview

A great product is only half the battle — customers need to know about it. These services help businesses reach their audience, generate qualified leads, and convert them into paying customers, using data-driven strategies across channels to maximise ROI.

Unlike generic agencies, the team understands technology businesses deeply and knows how to market to both technical and non-technical audiences.

Marketing services

Search Engine Optimization (SEO) Keyword research, on-page and technical SEO, content strategy, link building, local SEO, competitor analysis, and monthly reporting. Typical ROI 300–500% over 3–6 months.

Social Media Marketing Platform strategy, content creation, a 30–60 post calendar, community management, paid social, influencer marketing, and analytics across LinkedIn, Instagram, Facebook, Twitter, and YouTube.

Google Ads (PPC) Search, display and remarketing campaigns, keyword selection, ad copy, landing pages, bid management, A/B testing, and conversion tracking. Typically 2–4× ROI within 3 months.

Content Marketing 4–8 SEO blog posts/month, case studies, white papers and e-books, infographics, video, newsletters, and guest posting to build authority.

Email Marketing List building, automated sequences, responsive templates, segmentation, A/B testing, and analytics. Typical 20–30% open and 3–5% click rates.

LinkedIn Marketing (B2B) Profile optimisation, content strategy, lead generation, LinkedIn Ads, employee advocacy, and groups — best for SaaS, B2B services, and enterprise software.

WhatsApp Marketing Broadcast lists, WhatsApp Business, automated responses, rich media, status updates, and group marketing. 98% open and 45–60% response rates.

Conversion Rate Optimization (CRO) Website audits, A/B testing, landing page design, form optimisation, heat maps, and funnel analysis. Typically a 20–50% lift in conversion.

Industries served

Technology & SaaS

Education

E-commerce

Healthcare

Real estate

Professional services

Manufacturing

Our process

○ MONTH 1

Research & setup

Business and audience research, competitor analysis, strategy, account setup and tracking, first campaigns.

○ MONTH 2–3

Execution & optimization

Content creation, campaign monitoring, A/B testing, and weekly performance reviews.

○ MONTH 4+

Scaling & growth

Scale what works, expand channels, advanced strategies, and continuous optimisation.

Marketing packages

Startup

₹15,000 / month

Basic SEO, 2 social platforms, 4 blog posts, monthly report

Growth

₹30,000 / month

Advanced SEO, 3 platforms, Google Ads, 8 posts, email, bi-weekly calls

Enterprise

₹50,000 / month

Full-service, all channels, dedicated manager, weekly calls, CRO

Option Performance-based option available: a base fee plus a percentage of revenue generated.

Metrics we track

Website traffic (organic & paid)

Keyword rankings (top-10 positions)

Lead generation (forms, calls, emails)

Cost per lead (CPL)

Conversion rate

Return on ad spend (ROAS)

Social engagement

Email open and click rates

Revenue generated

Typical results (3–6 months)

SEO	100–300% increase in organic traffic; 50–100 qualified leads/month.
Google Ads	2–4× ROI; ₹50–200 cost per lead depending on industry.
Social media	50–100% follower growth; 5–10 organic leads/week.
Content marketing	3–5× website traffic in 6 months and established authority.

DIGITAL MARKETING — MARKETING DESCRIPTION

Marketing that understands technology businesses. SmartGrow Infotech runs SEO, Google Ads, social, content, email, LinkedIn, WhatsApp and CRO — data-driven, fully reported, and tied to revenue. Packages from ₹15,000/month, with a performance-based option available. Grow your pipeline: info@smartgrowinfotech.com

SERVICE 09 — AI / ML

AI / ML Projects & Training

A hands-on AI/ML training program plus custom AI solution development for businesses.

Service overview

AI and ML are transforming every industry. SmartGrow offers both a training program for students building AI skills and custom AI development for businesses — with a practical, hands-on approach that covers not just theory but how to build and deploy real AI systems.

AI/ML training program

A 3-month intensive program that takes beginners to job-ready AI engineers — 80% practical projects, 20% theory.

Duration	12 weeks (3 months)
Mode	Live online + offline (Hyderabad)
Schedule	3 days/week, 2 hours/session — 72 hours total
Batch size	Maximum 20 students

Curriculum

○ MONTH 1

Python & data science foundations

Python mastery, NumPy, Pandas, visualisation (Matplotlib/Seaborn), Jupyter/Colab; statistics, probability, distributions, hypothesis testing, linear algebra and calculus for ML.

○ MONTH 2

Machine learning

Supervised learning (regression, logistic, decision trees, random forests, SVM, KNN, evaluation metrics) and advanced ML (clustering, PCA/t-SNE, ensembles/XGBoost, feature engineering, imbalanced data, hyperparameter tuning).

○ MONTH 3

Deep learning & specialisations

Neural networks, TensorFlow/Keras, CNNs, RNNs, transfer learning; NLP (embeddings, sentiment, NER); computer vision (OpenCV, object detection, face recognition, segmentation).

Hands-on projects

- House price prediction (linear regression)
 - Customer churn prediction (classification)
 - Sentiment analysis of product reviews (NLP)
 - Face mask detection using CNN (computer vision)
 - Recommendation system (collaborative filtering)
-

What's included

- 72 hours of live training
- Lifetime access to recorded videos
- Study materials (PDFs, code, datasets)
- Google Colab Pro subscription (₹5,000 value)
- 5 industry-grade projects with code
- GitHub portfolio setup
- Certificate of completion
- 3 mock interviews for AI/ML roles
- Job referrals
- Lifetime WhatsApp support group

Training program pricing

Regular fee

₹35,000

per student

Early bird

₹30,000

Enroll 2 weeks before
batch

Group discount

₹28,000

per student, groups of
3+

Terms Payment: ₹15,000 advance + ₹15,000 after month 1. AI/ML engineers earn ₹6–12 LPA starting salary.

Custom AI solutions we build

Predictive analytics Sales forecasting, demand prediction, customer lifetime value, churn, risk models.

Natural Language Processing Chatbots, sentiment analysis, document classification, summarisation, translation, Q&A.

Computer vision Object detection, face recognition, OCR, defect detection, classification, video analytics.

Recommendation systems Product, content and job-matching recommendations; personalised marketing.

Anomaly detection Fraud detection, intrusion detection, manufacturing QC, healthcare alerts.

AI development process

○ WEEK 1

Discovery & data

Understand the problem, collect and explore data, assess feasibility, define metrics.

○ WEEK 2–4

Model development

Cleaning, feature engineering, training, tuning, and evaluation.

○ WEEK 5–6

Deployment

API development (Flask/FastAPI), cloud deployment, frontend integration, monitoring, and documentation.

AI project pricing

Simple AI project

**₹50,000 –
₹80,000**

Basic ML models, small
datasets

Medium complexity

**₹1,00,000 –
₹2,50,000**

Advanced ML/DL,
custom models, APIs

Complex AI solution

₹3,00,000+

Multiple models, real-
time, scalable
infrastructure

Time Timeline: 6–12 weeks depending on complexity.

Success stories

Completed the AI/ML training, built 5 projects, and got placed at Accenture as an ML Engineer at ₹8 LPA.

Srikanth · JNTUH

Business project	A customer churn prediction model for a telecom client reduced churn by 25% and saved ₹50L annually.

AI / ML — MARKETING DESCRIPTION

Build AI skills or build AI products. SmartGrow Infotech runs a hands-on 3-month AI/ML program (Python, ML, deep learning, NLP, computer vision — 5 real projects, certificate, referrals) and builds custom AI: predictive analytics, NLP, computer vision, recommendations and anomaly detection. Training from ₹28,000; projects from ₹50,000. Talk to us: info@smartgrowinfotech.com

SERVICE 10 — US IT STAFFING

US IT Staffing

Pre-vetted Indian developers for US companies — at 40–60% lower cost, without quality compromise.

Service overview

SmartGrow connects US companies seeking tech talent with highly qualified Indian developers who work as remote contractors — offering significant cost savings without compromising quality.

Developers work in US time zones, communicate fluently in English, follow US business practices, and deliver to US quality standards — all at 40–60% lower cost than hiring locally in the US.

Why US companies hire through us

Cost savings without quality compromise

40–60% cost reduction Typical US developer \$120–180/hour; these rates \$50–75/hour.

No benefits overhead No health insurance, 401k, or other employee benefits.

No recruitment costs Sourcing, screening, and interviews are handled for you.

Flexible scaling Ramp up or down without severance concerns.

No infrastructure costs Developers work from their own setup.

Quality & reliability

Pre-vetted talent Only the top 5% of applicants pass screening.

Proven experience 3–10+ years of hands-on experience.

Strong communication Fluent English, experienced with US teams.

Time-zone overlap Minimum 4–5 hours overlap with EST/PST.

Accountability Performance is managed and issues are handled.

Technical expertise provided

Software development Full-stack, backend, frontend, and mobile engineers.

Data & analytics Data engineers, data scientists, analysts, and ML engineers.

Cloud & DevOps DevOps engineers, cloud architects, SREs, and security engineers.

Specialised roles QA/test engineers, UI/UX designers, business analysts, and technical project managers.

Vetting process

○ STEP 1

Resume screening

Experience, technologies, English proficiency, and US exposure.

○ STEP 2

Technical assessment

Coding tests, system design, and technology-specific questions — 95% are filtered out here.

○ STEP 3

Technical interview

A 1-hour deep dive on problem-solving, architecture, and best practices.

○ STEP 4

Communication assessment

English fluency and explaining technical concepts.

STEP 5

Background verification

Employment history, education, and references.

Result The result: only 5% of applicants make it into the talent pool.

How it works

Profiles	3–5 pre-screened candidate profiles within 48 hours.
Interview	Interview candidates directly, with assistance if needed.
Trial	A two-week paid trial to evaluate fit.
Onboard	Sign the contract and the developer starts.
Ongoing	Payroll, performance, and any issues are managed for you.

Contract types

Full-time	40 hrs/week — dedicated resource for long-term projects.
Part-time	20 hrs/week — maintenance, support, small projects.
Project-based	Fixed scope and timeline.
Staff augmentation	Integrate with your existing team.

Hourly rates (full-time)

Junior (1–3 yrs) \$35 – \$45 / hr Maintenance, support, junior tasks	Mid-level (3–6 yrs) \$45 – \$60 / hr Feature development	Senior (6–10 yrs) \$60 – \$75 / hr Architecture, complex problems, leadership
Architect/Lead (10+ yrs) \$75 – \$100 / hr System design and strategy		

Save Comparison: a US developer costs \$120–180/hour — a 40–60% saving for the same quality.

Billing terms

Invoicing	Monthly, based on hours worked.
Time tracking	Hubstaff, Jira, or your preferred tool.
Payment	Wire transfer, PayPal, or Wise (USD).
Contract	Standard MSA.
Minimum commitment	3 months after the trial.

Quality guarantees

- Two-week trial before long-term commitment
- Free replacement if a developer doesn't work out
- Performance management of underperformance
- Guaranteed 4–5 hours daily overlap
- Response within 4 business hours
- NDA and IP-assignment agreements
- Backup resources for continuity

For Indian developers: join the talent pool

Higher earnings \$50–75/hour = ₹1.5–3L/month vs ₹60–80K in Indian companies.

Work-life balance Remote work with flexible hours and some US overlap.

International exposure Cutting-edge US projects and world-class teams.

Stable income Long-term contracts and reliable payments.

US IT STAFFING — MARKETING DESCRIPTION

Hire pre-vetted Indian developers at 40–60% lower cost. SmartGrow Infotech provides remote contractors (top 5% of applicants) across full-stack, data, cloud/DevOps and specialised roles — with US time-zone overlap, a 2-week trial, free replacement and a standard MSA. Rates from \$35/hour; profiles in 48 hours. Contact: info@smartgrowinfotech.com

VOLUME 3 — TECHNOLOGY

Technology Index

The complete technology stack used across all SmartGrow services, in one place.

Frontend

- React.js
